## Advising Information

The following information provides a guide for advisors who are helping students enroll in this program.

### Program Notes

The best time to start this program is fall, however students can start any semester if they have the required prerequisites for the classes they want to take. Note that even though many ARV classes have no prerequisites, a very good grasp of basic computer use and navigation along with basic verbal, grammar and spelling skills are required for success in this curriculum.

Some level of proficiency with Adobe Creative Suite is highly recommended. If a student has had none or limited exposure to this software, CPT 160 or CPT 161 is recommended prior to enrollment in ARV courses.

Students will be responsible for obtaining a quality digital single lens reflex or mirrorless camera, a subscription to the Adobe Creative Cloud suite of products, and access to a color printer. The instructor will provide details as necessary.

Several investments must be made for a future in commercial arts, including a computer, a specialized digital single lens reflex or mirrorless camera, portable external hard drives, jump drives, etc.

### Notes About Individual Classes

ENG 165 will meet the requirements of this program. Students will follow this progression, with their starting point being determined by their placement test scores: ENG 032/012 and/or RDG 032/012 (or RWR 032/012) > ENG 100 and/or RDG 100 (or RWR 100) > ENG 165. ENG 101,

a class which is more likely to transfer, can be substituted for ENG 165 if the student is considering pursuing a four-year degree in the future.

MAT 170 or MAT 155 will meet the requirements of this program. Students will follow this progression, with their starting point being determined by their placement test scores: MAT 032/012 > MAT 170 or MAT 155. Students may choose to take a higher-level math course if they want a class that is more likely to transfer to a four-year institution.

BIO 112, which provides a basic understanding of bone and musculature structure that is useful in accurately rendering the human form in drawings and design, is the recommended course for any ARV student in an associates program. However, BIO 101, EVT 155 or EVT 156 will also meet the requirements for this degree. Different prerequisites, which are listed in the Academic Catalog and which should appear in DegreeWorks, are required for each science class.

PSY 103, PSY 201, or any other social science will be acceptable for the social science general education requirement.

It is strongly recommended that developmental or transitional classes be taken first.

## Program Purpose Statement

The A.A.S., General Technology with a primary specialty in Photography and secondary specialty in Advertising Design provides an opportunity for students to pursue multiple areas of specialization and earn an associate degree by completing additional course work in general education. The degree may prepare graduates to transfer and continue their education at the baccalaureate level upon graduation or to become employed in the Photography industry at the corporate or private sector levels, Photographic studios and service bureaus, as well as marketing support and development.
