

HEATING, VENTILATION, AND AIR CONDITIONING TECHNOLOGY, A.A.S. - HVA3

One of the fastest-growing service occupations, Heating, Ventilation and Air Conditioning has seen major changes over the past years as a result of the national emphasis on fuel conservation and environmental concerns.

Every private residence, business, industry and agency needs the skill of technicians trained in the installation, maintenance and repair of air conditioning, refrigeration and heating systems.

Students are trained to diagnose and repair malfunctions; size, fabricate and install air duct systems; and estimate cooling and heating loads for selection of the most efficient systems for a given building. Practical training in a well-equipped shop gives students on-the-job experience before they graduate. EPA technician certification is taught and the test is offered to all curriculum students.

Four certificate programs are offered: Introduction to HVAC - (Quickskills), HVACR Installers, Heating Fundamentals, and Refrigeration Applications.

Application and Advising

If you are ready to start your education, there are a few simple steps involved in enrolling at Piedmont Technical College.

Get Started Today (https://www.ptc.edu/admissions/new-students/)

Advising Information

The following information provides a guide for advisors who are helping students enroll in this program.

Program Notes

It is best to start in the Fall semester.

Students will earn an A.A.S., Major in HVAC Technology (HVA3) by the completion of the Refrigeration Applications Certificate, the Heating Fundamentals Certificate and completion of (18 credit hours-which includes CPT 101 or CPT 169) of general education.

Courses are offered during day and evening hours

Top-quality tools, meter and gauges, which are required for this program, will cost \$500 - \$700. There is a list at the bookstore, or you can contact Robbie Hill (https://websrv.ptc.edu/directory/Robbie_Hill12349/) for more information.

Program Student Learning Outcomes

Purpose Statement

2

Purpose Statement – The HVAC program is dedicated to assisting adult learners in the development of the skills and knowledge necessary to the student's success and to support their educational goals for employment and profession growth in the HVAC/R field. The program offers a wide range of credentials including the Associate in Applied Science Degree and two certificates in HVAC Technology.

Program Student Learning Outcomes

- 1. Install, repair and service most light commercial refrigeration systems.
- Use a wiring schematic in troubleshooting most air conditioning, heating, and refrigeration systems.
- 3. Install and service most residential heat pump systems.
- Use most of the tools and meters associated with the air conditioning and refrigeration industry.
- 5. Calculate residential heat loss and heat gain.
- Test and balance air quantities in most heating and air conditioning systems.

ACR 242

Electronic Controls

- 7. Install and service most heating systems including gas, oil, and electric.
- 8. Apply safety rules and regulations when working.
- 9. Install, repair and maintain most domestic refrigeration systems.
