

REFRIGERATION APPLICATIONS CERTIFICATE - ACR7

The Refrigeration Applications Certificate provides students with the theory and hands-on training in the operation of refrigeration system design and component application. The certificate program will focus on installation, start-up, service repair and preventative maintenance of commercial and domestic refrigeration systems.

The students will be required to successfully complete the EPA 608 Refrigerant Handling Certification Exam in ACR 175 EPA 608 Certification Preparation and the Electrical Certification Exam in ACR 140 Automatic Controls.

Refrigeration applications graduates will have opportunities to work in the refrigeration industry in one or more of the following areas: service and repair of refrigeration systems, service and repair of domestic refrigeration systems, service and installation of food and vending refrigeration equipment and service and installation of supermarket equipment.

Advising Information

The following information provides a guide for advisors who are helping students enroll in this program.

Program Notes

It is best to start in the Fall semester. If a student wishes to enroll during spring or summer term, contact program coordinator for guidance.

Courses are offered during day and evening hours.

Top-quality tools, meter and gauges, which are required for this program, will cost \$500 - \$700. There is a list at the bookstore, or you can contact department head for more information.

Program Student Learning Outcomes

Purpose Statement

The refrigeration application certificate is dedicated to assisting adult learners in the development of the skills and knowledge necessary to the student's success and to support their educational goals for employment and professional growth in the refrigeration field.

Program Student Learning Outcomes

1. Install, repair and service most light commercial refrigeration systems.
2. Use a wiring schematic in troubleshooting most air conditioning, heating, and refrigeration systems.
3. Use most of the tools and meters associated with the air conditioning and refrigeration industry.
4. Apply safety rules and regulations when working.
5. Install, repair and maintain most domestic refrigeration systems.
