Advising Information

The following information provides a guide for advisors who are helping students enroll in this program.

Program Notes

Every course in the Greenhouse Management Certificate applies toward the Associate in Applied Science - Major in Horticulture Technology degree

Program Student Learning Outcomes

Purpose Statement

The purpose of the Greenhouse Management Certificate is to cultivate enthusiastic, knowledgeable, and skilled professionals that are equipped for careers in the field of greenhouse management, including knowledge of managing greenhouse structures and growing greenhouse crops by providing them with theoretical and hands-on, industry and research-backed training in the latest greenhouse management sciences, practices, technologies and equipment.

Student Learning Outcomes

1. Propagate and grow marketable plants in commercial plant production settings.
2. Diagnose and provide solutions for biotic and abiotic plant problems utilizing principles of integrated pest management.
3. Visually identify ornamental plants and provide their scientific names, growth habit, and cultural requirements for optimal growth in the landscape.
