Advising Information

The following information provides a guide for advisors who are helping students enroll in this program.

Program Notes

Every course in the Landscape Management Certificate applies toward the Associate in Applied Science - Major in Horticulture Technology degree.

Program Student Learning Outcomes

Purpose Statement

The purpose of the Landscape Management Certificate is to cultivate enthusiastic, knowledgeable, and skilled professionals that are equipped for careers in the field of landscape and grounds management, including the management of trees, shrubs, annuals, and turfgrass by providing them with theoretical and hands-on, industry and research backed training in the latest landscape management sciences, practices, technologies and equipment.

Student Learning Outcomes

1. Maintain healthy and well-manicured lawns, golf courses, athletic fields, and landscapes.
2. Diagnose and provide solutions for biotic and abiotic plant problems utilizing principles of integrated pest management.
3. Visually identify ornamental plants and provide their scientific names, growth habit, and cultural requirements for optimal growth in the landscape.

4. Design, install, and troubleshoot basic residential and commercial irrigation systems.
5. Provide specialized care for trees grown in the urban environment.
