

ADVANCED WELDING, CERTIFICATE - WLD8

Advanced Welding Certificate provides the student with the skills necessary to perform tasks to the American Welding Society (AWS) standards in multiple processes. Through a combination of classroom and laboratory training, the student will learn the applications of Gas Metal Arc Welding (GMAW), Shielded Metal Arc Welding (SMAW), and Gas Tungsten Arc Welding (GTAW), as well as the necessary safety, blueprint reading, and practical application skills needed for employment in today's welding industry.

Advising Information

The following information provides a guide for advisors who are helping students enroll in this program.

Program Notes

- Students may begin this program in the fall, spring and summer semesters depending on booth availability.
- WLD courses are offered during days and evenings.
- Students who work alternating shifts are encouraged to enroll in the certificate program and to rotate between day and evening classes to fit his/her work schedule.
- Graduates can complete a Welding Diploma or an Associate Degree in Occupational Technology with completion of additional coursework.
- Students should be prepared to purchase first semester welding supplies costing \$226.60. Supplies for the second semester of welding will cost approximately \$150.

Program Student Learning Outcomes

- Read and interpret occupationally specific blueprints for welders
- Perform Gas Metal Arc Shielded Metal Arc, and Gas Tungsten Arc welds to acceptable industry standards.
- Demonstrate the necessary skills needed to apply GMAW SMAW AND GTAW on various joint designs.
- Understand and demonstrate occupational welding safety practices.
